

Accelerate hiring with AI-powered Screening & Scheduling.

Increase hiring efficiency with intelligent screening and scheduling across professional and high-volume hiring. AI agents within the Radancy Talent Acquisition Cloud optimize how teams identify, screen, schedule and assess talent. This automation reduces manual effort, minimizes bias and accelerates time to fill while lowering the cost of hiring.

Smarter candidate evaluation. More efficient interview coordination.

One-Way Video Screening

Enable candidates to respond on their own time, helping teams evaluate talent faster without early-stage scheduling friction. AI can transcribe and score responses, while hiring teams can review recordings for authenticity. Video is optional, with voice or text alternatives to support accessibility and fairness.

ATS-Connected Workflows

Integrate seamlessly with systems like Workday through bi-directional data flows that automatically update screening results, candidate scores and interview statuses. Improve visibility, enable logic-based workflows and reduce manual effort across the hiring process.

Conversational AI Screening and Evaluation

Screen candidates 24/7 with AI agents that guide responses and generate fit scores. Built-in guardrails ensure consistency and reduce bias – giving hiring teams faster access to qualified talent.

Transparent Candidate Scoring

Surface top candidates faster with transparent scoring and automated workflows. Advance candidates with full autonomy or human oversight without losing control.

Automated Interview Scheduling

Coordinate interviews with AI agents synced to Outlook and Google Calendar, allowing candidates to self-schedule. Teams can easily manage and adjust interviews, reducing back-and-forth to accelerate the hiring of qualified talent.

Work Directly in Microsoft Teams

Leverage AI scheduling agents to coordinate interviews, manage bookings and handle rescheduling directly within Microsoft Teams. This improves speed and coordination without disrupting existing workflows.

Responsible AI that Supports Better Hiring Decisions

Radancy's Screening & Scheduling automates efficiency while maintaining control. Built-in human oversight enables teams to move faster with greater transparency, driving stronger hiring outcomes.
